GETTING STARTED

Introduction

Thank you for choosing M.E.N's Concert Ticketing Purchase system for guaranteed and secure ticket sales. Here in the user's manual, we have detailed descriptions of the systems' functions and your role as the user. The manual includes how to run the application and the requirements to run the application.

SOFTWARE REQUIREMENTS

In order to run the given files please ensure you have the necessary software.

VirtualBox Graphical User Interface

Version 7.0.20 r163906 (Qt5.15.2)

SEED-Ubuntu20.04.vdi

server.py client.py, & concert_data.db file

Python 3.8.5

INSTRUCTIONS

STAGE 1: STARTUP

1. Open VirtualBox

2. Power on SEED Ubuntu Machine

3. Login to your SEED Ubuntu:

Default Credentials -

- Username: your username
- Password: your password

4. Open command prompt and create a directory to store essentials files. After making directory move the downloaded files (server.py client.py, & Concert_data.db) into the new directory.

1. `mkdir ~/Concert`
2. `cd Downloads`
3. `mv server.py client.py Concert_data.db /home/seed/Concert`

STAGE 2: OPERATIONAL

5. While in the Concert directory create the server and client SSL certificate.

- `openssl req -x509 -newkey rsa:4096 -keyout key.pem -out cert.pem -days 365 -nodes`

6. Open Two additional terminals

- In the first terminal run the command `"python3 server.py"`
- In the second terminal run the command `"python3 client.py"`

7. Select the terminal running the Client.py file. From here you should see a welcome message and 5 menu options to select from.

1. Purchase a ticket – User will choose an artist to purchase concert tickets based on Genre
2. Add to my ticket purchase – User will be able to add to previous purchase based on
3. Cancel my ticket purchase – User will be able to remove ticket purchase based on
4. Verify ticket information – User will be able to validate ticket purchases based on
5. Exit – User ends connection and closes program

```

seed@VM: ~
[04/21/25] seed@VM:~$ mkdir ~/Concert
[04/21/25] seed@VM:~$ ls
Concert  Documents  Music      Public  Templates
Desktop  Downloads  Pictures   snap    Videos
[04/21/25] seed@VM:~$ █

```

```

[04/21/25] seed@VM:~/Concert$ ls
cert.pem  client.py  Concert_data.db  key.pem  server.py

```

TERMINAL 1

```

[04/21/25] seed@VM:~/Concert$ python3 server.py &
[1] 3621
[04/21/25] seed@VM:~/Concert$ Secure server started on 127.0.0.1:49815
